

## Clark Forklift Part

Clark Forklift Part - Currently, there are at least 350,000 Clark lift trucks performing worldwide, and in excess of 250,000 in service in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive companies in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, covers more than 120,000 particular items fabricated for 20 unique models of forklifts and automated equipment. Your local Clark Supplier is your total source for availability of all your components needs provided by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently situated in Louisville, Kentucky, which serves both their customers and dealers in North America, and Changwon, South Korea, which handles their Asian dealers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Motivated to supply the highest level of value and service to our users, Clark remains on the cutting edge when it comes to enhancing productivity and benefiting performance.

Internationally, Clark has one of the most amazing dealer support networks. With over 550 locations worldwide, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the materials handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional commitment to safety is currently a standard feature on every lift truck.

Clark's relentless effort to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the globe to be certified with the globally approved quality standard ISO 9001 for each and every one of their manufacturing plants. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant industry position.

Clark has chosen the very economical and advantageous structure of "Lean Manufacturing" for its assembly facilities and application of resources. This structure was developed to acknowledge the most efficient approaches of production plant management and ensuring maximum proficiency. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working together, Clark's product suppliers and engineers communicate towards enhancing product effectiveness while minimizing costs. The contemporary value engineering agenda combines innovative product improvement and provides superior client support and service within the industry.
