

Advance-Nilfisk Parts

Advance-Nilfisk Part - Think about how long and tiresome it would really be to tidy up right after a party, with no help from machines. Previously, the dust from carpets and upholstery had to be beat out of them manually; brushes, cleaning cloths and brooms were the leading cleaning products back then.

The founder of Nilfisk-Advance, P.A. Fisker, began as an electrical engineer who liked to work on electrical motors. After starting his company during the year 1906, he started to produce motors to drive fans, machine tools, drills and coffee grinders. Mr. Fisker's dream from the start was to own a worldwide business selling goods internationally.

The Nilfisk C1 was a revolutionary breakthrough in the cleaning trade. Mr. Fisker invented an amazing, ground breaking vacuum cleaner that can be operated by a single person for the reason that it only weighed 17.5 kilos! This invention came in a time where various cleaning machines were huge and needed 4 or more operators, thus, the Nilfisk C1 transformed everything and evolved the way we clean forever. The brain behind these very first cleaning equipment remains unparalleled. Cleaning machines provide an excellent solution to an existing crisis; things get filthy and have to be cleaned regularly, without a lot of effort.

Slowly, the business Nilfisk-Advance developed through the years. During the the early part of the nineteen eighties the business expanded fast when the company became a part of the NKT Group. With new owners on board, they concentrated on driving Nilfisk-Advance ahead within the trade, trying to be an active international player in producing professional cleaning equipment. Nilfisk-Advance is currently represented in all parts of the globe due to steadily acquiring a lot of smaller businesses to be able to develop their product range and presence in new markets. They are proud to offer a range of cleaning solutions to suit each need.
