

## Pulp Clamps

Pulp Clamps - There are actually a lot of different forklift attachments which could be used in order to make forklifts way more helpful. Snowplow attachments could be mounted onto the front of a lift truck. A scoop bucket could be helpful if the task requires moving soil, sand, snow, or gravel. A double block handler permits the forklift operator to pick up 2 loads and pile them side-by-side. A lot of of these accessories are considered ideal for light to medium duty work.

Amongst the forklift attachments, referred to as a package lift clamp, allows for the moving and lifting of very heavy pallets. Pallet crane forks are also used to move and lift pallets by utilizing an overhead crane. A drum clamp attachment is useful for transferring really heavy drums from one place to another without having to utilize a pallet. Forklift mounted hoppers enable materials to be moved and dumped with out having to do it manually. These hoppers are self dumping when the bumper is released.

There are also accessories accessible that could transform the lift truck right into a commercial mop or broom. Such accessories are perfect for cleaning boat docks, warehouse floors and parking areas. Forklift mounted platforms come geared up with twin entry doors and can be hooked up in order to move employees from one locale to another. The mounted platform accessory is ideal for reaching areas which could be difficult to access, especially when you've got merchandise or supplies stored in out of the way locations or really up high.

Attachments could be a very valuable piece of equipment when installed onto a lift truck, changing an typical lift truck into a mobile hoist unit. It is most helpful when moving unbalanced or awkward loads. This attachment could either be mounted on the carriage itself, telescopic, or be attached or even lift truck mounted.
